EDUCATION

Bachelor of Science in Computer Science **Expected Jun 2027**
Seattle Pacific University *Seattle, WA*

- Relevant Coursework: *Data Structures and Algorithms, Statistical Modeling, System Design, Operating Systems, Database Systems, Senior SWE Capstone, Discrete Math, Linear Algebra, Management Information Systems*
- GPA: 3.88/4.00

EXPERIENCE

Product Intern **Feb 2026 – Aug 2026**
Dreamscape Learn *Remote*

- Developed instruction-ready supplemental materials for immersive biology and chemistry curricula, detecting and correcting inconsistencies to improve content accuracy and overall curriculum quality
- Completed **comprehensive QA** across **3 courses** and **18 modules**, systematically reviewing thousands of individual content elements while documenting bugs, usability concerns, and recommended solutions
- Managed multiple concurrent deliverables including the development of an **interactive web simulation** to be used in Dreamscape Learn's astronomy courses at **Arizona State University**

Computer Science Learning Assistant **Oct 2025 – Jun 2026**
Seattle Pacific University *Seattle, WA*

- Supported **25+ students** in developing and debugging programming projects in **C++/Python**, emphasizing clean code practices and algorithmic efficiency
- Provided **one-on-one mentorship** for foundational computer science concepts, including data structures, algorithms, and object-oriented programming
- Collaborated with **2 course instructors** and **20+ learning assistants** to ensure teaching procedures and tutoring content aligned with course learning objectives

Software Engineer Fellow **Jul 2024 – Sep 2024**
Headstarter *Remote*

- Built and deployed **4 AI-based web applications** leveraging **OpenAI**, **React.js**, **Node.js**, **Next.js**, and **Firebase**
- Improved productivity across multiple academic and daily-use scenarios by deploying **4 AI-driven applications** focused on task efficiency and user support
- Practiced **agile principles,** including sprint planning, stand-ups, and discussions in a **team of 3 developers**

PROJECTS

QuestEats: Gamified Restaurant Discovery Platform | *Express.js, JavaScript, MongoDB, React.js*

- Built a frontend in **React** for a gamified restaurant discovery platform using real-time **Yelp Fusion API** data
- Implemented a **quest-driven discovery component** that dynamically renders **multiple Yelp-sourced restaurant options per quest**

Data Drive: Fuel Economy Forecasting | *Data Transformation, Predictive Modeling, R Studio*

- Developed a **multiple regression model** achieving **83% accuracy** in predicting vehicle fuel efficiency
- Applied **4+** variable selection techniques to identify optimal predictors for the machine learning model
- Evaluated effectiveness of **10 model iterations** through residual analysis, ANOVA F-tests, and Wald Z-tests

TECHNICAL SKILLS

Languages: C++, HTML/CSS, Java, JavaScript, Python, R, SQL
Libraries & Frameworks: Express.js, Flask, Material-UI, Next.js, Node.js, Pandas, React.js, Scikit-learn, Tableau
Certifications: Microsoft Office Specialist: Excel Associate (Office 2019)
